

## Licenses of Plugin Libraries

The KMPlayer uses the following libraries as plugin. It is not essential to execute the player as it is fundamentally based upon the multimedia framework called directshow. The core part of the player has been written by delphi from scratch.

:: <http://www.gnu.org/copyleft/gpl.html> libmpeg2 : <http://libmpeg2.sourceforge.net/> libmad : <http://www.underbit.com/products/mad/> liba52 : <http://liba52.sourceforge.net/> libdca : <http://developers.videolan.org/libdca.html> libmpalayer : <http://www.mplayerhq.hu/> MediaInfo : <http://mediainfo.sourceforge.net/> Gabest's filters\* : <http://sourceforge.net/projects/guliverkli/> (Splitter : Avi;MKV;RM;OGG/OGM;MPEG;MP3/AAC;Dirac;DSM;Nut;RadGt;MP4 Decoder : Audio(MPEG1/2;AAC;AC3;DTS), Video(MPEG1/2) Stream Switcher)

<GNU General Public License, version 2> :: <http://www.gnu.org/licenses/old-licenses/gpl-2.0.html> LAV Filters : <https://code.google.com/p/lavfilters/> (Splitter, Video Decoder / Audio Decoder)

:: <http://www.gnu.org/copyleft/lesser.html> libavcodec : <http://ffmpeg.sourceforge.net/> XviD : <http://www.xvid.org/> MPC : <http://www.musepack.net/> mmswitch : <http://corecodec.org/projects/mmswitch> iconv.dll : <http://www.gnu.org/software/libiconv/> libfaac.dll : <http://www.audiocoding.com> FastMM : <http://fastmm.sourceforge.net>

:: [http://en.wikipedia.org/wiki/BSD\\_license](http://en.wikipedia.org/wiki/BSD_license) Ogg(Vorbis) : <http://www.xiph.org/ogg/vorbis/> FLAC : <http://flac.sourceforge.net/> Theora : <http://www.theora.org/>

:: <http://www.mozilla.org/MPL/> Image loader : <http://www.delphi-gems.com/Graphics.php>

Libfaad2 : GPL, owned by Ahead : <http://www.nero.com/> Monkey's Audio : Custom license : <http://www.monkeysaudio.com/> BASS : free for non-money making use : <http://www.un4seen.com/> Unrar library : Free : <http://www.rarlab.com/> DirectX SDK Library, DirectShow BaseClass - [www.prodigy.com](http://www.prodigy.com) & JEDI Project..
